

Part # 10-2054

The Weldas® quality general purpose welding gloves are made of heat and flame resistant shoulder split cowhide. These are a favorite among welders looking for upper arm protection. The standard features of these gloves include a full sock cotton lining for added comfort and Kevlar® stitching with welted seams for added durability. 18" Guantlet provides additional forearm and elbow protection against nicks, cuts & heat. These leather gloves have an extra long cuff for upper arm heat and flame protection.

Applications

Medium / Heavy Duty Welding, Cutting, Material Handling

Testing

Meets
ANSI/AWS Z49.1
